# Customer Benefits

Argent Omega Versus Argent AT

ARGENT

## Brand-New Argent Omega Super Console

The Argent Omega Super Console delivers a completely new experience with an overview status display of the entire environment.

Not only is the Argent Omega Super Console visually attractive, but it also automatically and logically presents an environment summary to the customer – Live, 24 x 7.

The screenshot displays the Argent Omega Super Console interface. At the top, a navigation bar includes the logo 'ARGENT OMEGA (2.2A-2207-A)' and menu items like Home, Theme, Argent Instant help, About, and Logout. A central banner indicates 'Everything is Good: 98%' with status indicators for Good, Fair, and Poor.

The dashboard is divided into several sections:

- Resource Usage:** Internet Capacity (0.39%), Switches (6), Access Point (2), Client Wifi (0), Guests (0), ESX Datacenter Pool (0), and ESX Resource Pool (0).
- System Components:** ESX Cluster (0), ESX-ESXi Host (0), Linux (1), FTP Server (0), Domain Controller (0), TCP-IP Device (6), and URL (1).
- Workstations and Accounts:** W20xx Workstation (49), AWS Account (0), and W20xx Server (0).

At the bottom, there are two main panels:

- Last 5 Events - All:** A table listing recent events with columns for Status, Event Time, Relator, Rule, Server, and Product. Each entry includes an 'Answer' button.
- Alerts by Criticality - All:** A summary table showing the count of alerts by criticality level.

Criticality	Unanswered	Answered	Resolved	Total
Low	1	0	5	6
Medium	0	0	0	0
Critical	0	0	0	0
<b>Total</b>	<b>1</b>	<b>0</b>	<b>5</b>	<b>6</b>

## Enhanced and Simplified User Interface

Argent Omega's user interface is web-based and completely secure.

Customers can now access ALL Argent Omega Monitoring Tool Sets from ONE screen.

Customers can choose to work traditionally on-prem, or provide access to the cloud and work from anywhere.

The screenshot displays the Argent Omega web interface. The top navigation bar includes the logo, version number (2.2.A - 2207 - A), and links for Home, Theme, Argent Instant, About, and Logout. A left-hand navigation menu lists various tool sets under the 'Tool Sets' category. The main content area features a search bar and a dropdown menu for 'Choose Global Security Object'. Below this is a table with columns for 'Name' and 'Description', listing several tool sets.

Name	Description
Argent Omega Baseline	
Argent Compliance Automator	
Argent Omega Web Defender	
Argent Omega for Microsoft 365	
Argent Omega for SNMP	
Argent Omega for SQL Server

## Modernized and Improved Graphical User Interface

Argent Omega has a modern, improved graphical user interface.

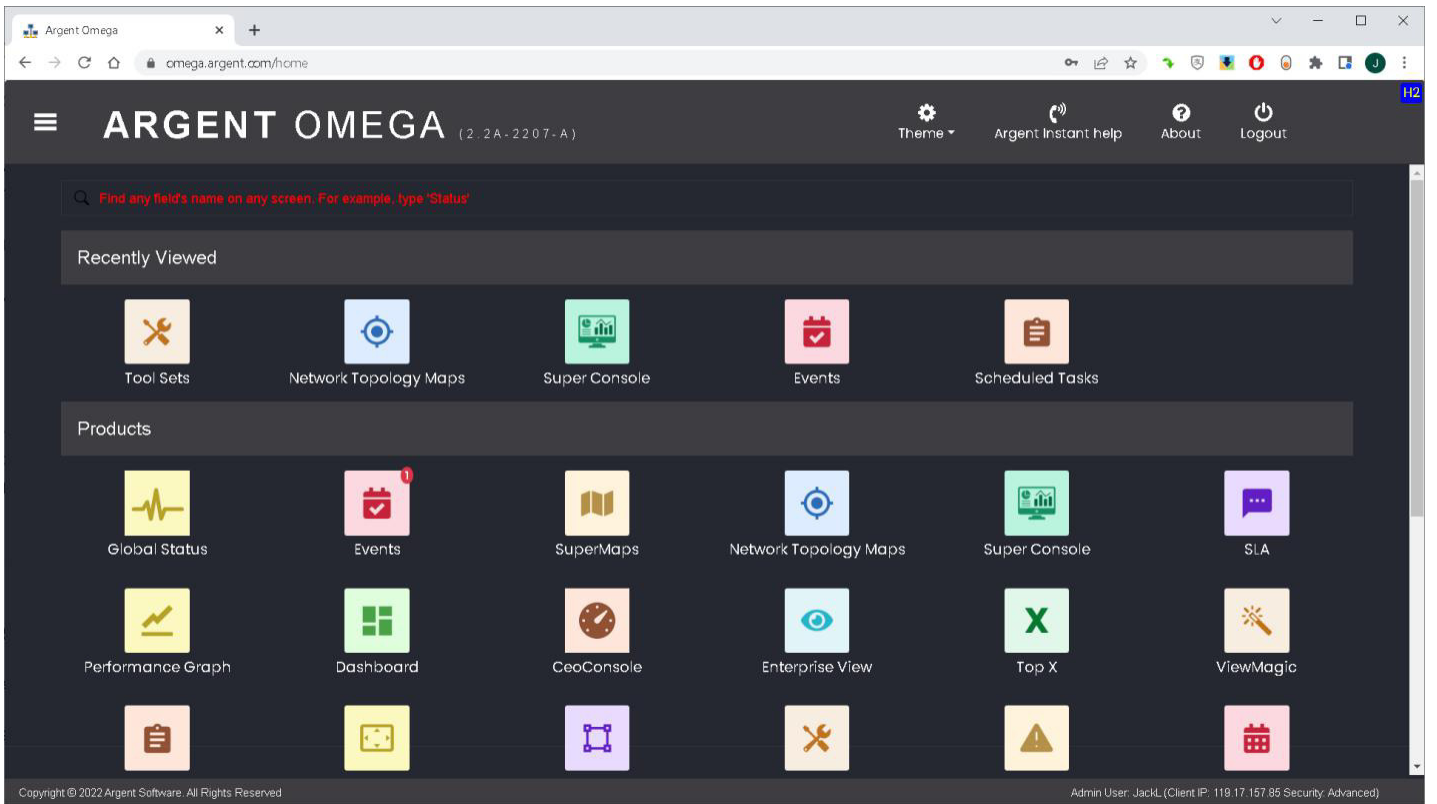

The landing screen offers a new search feature to assist product navigation and prevent “getting lost” in the GUI.

The product supports Theme customization to fit various needs, such as a Dark Theme when customers prefer a high-contrast graphical interface.

### Default Dark Blue Theme

# Dark Theme – 19 Themes Are Available

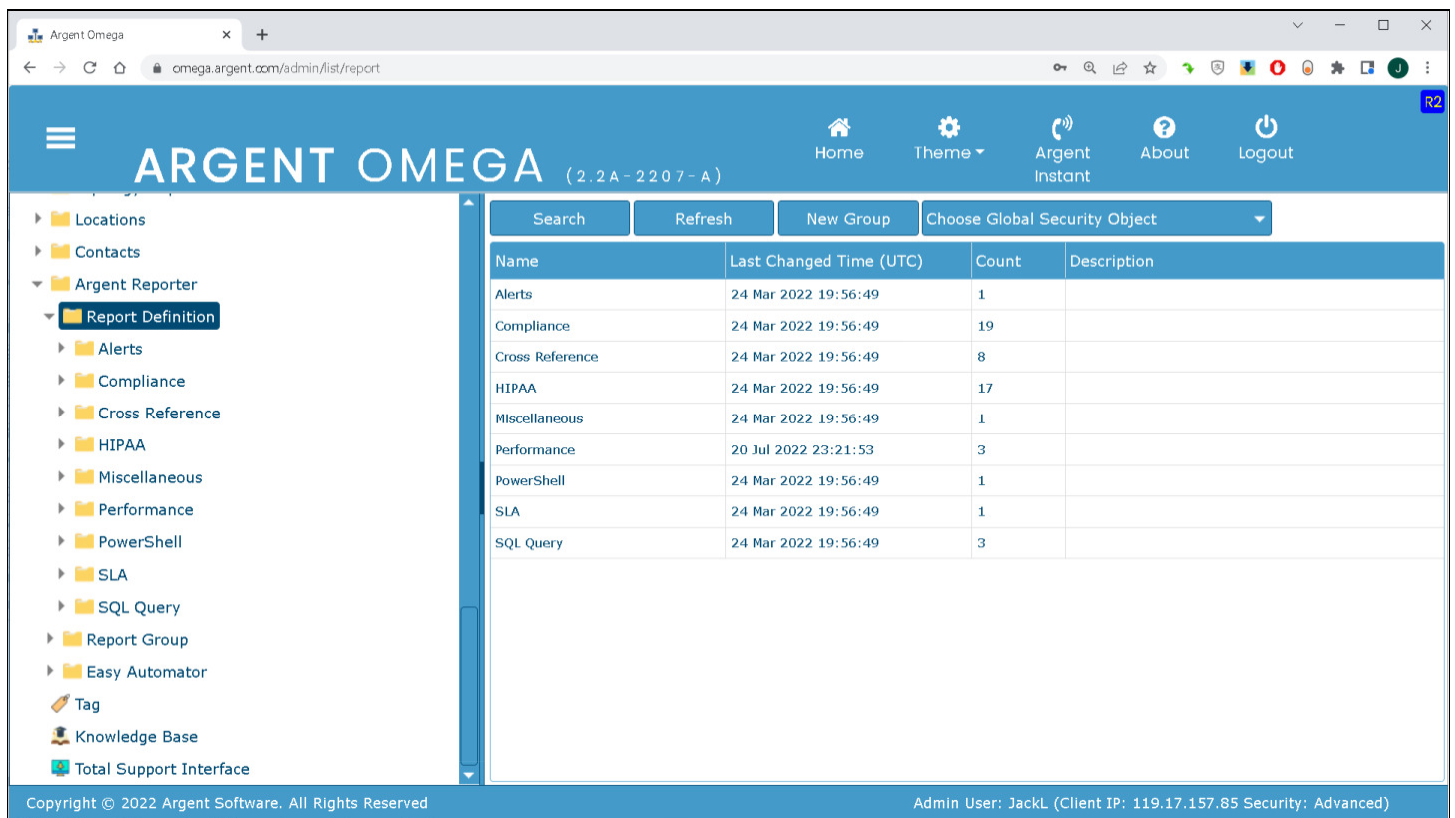

## Reporting Feature Is Now Out-Of-The-Box

As part of Argent Omega, Argent Reporter now provides out-of-the-box reporting capability.

Argent Reporter offers more customizable reporting, using the popular, industry-standard report definition language (RDL).

Argent Reporter includes instant best practice compliance reporting.

Argent Reporter supports SQL Job Reporting as a new additional feature. This saves customers the time spent manually and individually creating multiple SQL job reports for database servers.

The screenshot displays the Argent Omega web application interface. The top navigation bar includes the 'ARGENT OMEGA' logo (version 2.2.0 A - 2.2.0 7 - A) and navigation links for Home, Theme, Argent Instant, About, and Logout. A left sidebar menu lists various categories, with 'Report Definition' selected and expanded to show sub-items like Alerts, Compliance, Cross Reference, HIPAA, Miscellaneous, Performance, PowerShell, SLA, and SQL Query. The main content area features a table with columns for Name, Last Changed Time (UTC), Count, and Description. The table lists various report definitions and their counts.

Name	Last Changed Time (UTC)	Count	Description
Alerts	24 Mar 2022 19:56:49	1	
Compliance	24 Mar 2022 19:56:49	19	
Cross Reference	24 Mar 2022 19:56:49	8	
HIPAA	24 Mar 2022 19:56:49	17	
Miscellaneous	24 Mar 2022 19:56:49	1	
Performance	20 Jul 2022 23:21:53	3	
PowerShell	24 Mar 2022 19:56:49	1	
SLA	24 Mar 2022 19:56:49	1	
SQL Query	24 Mar 2022 19:56:49	3

## Network Topology Mapping Capability

Argent Omega supports Network Topology Mapping – out of the box. With Network Topology Mapping, customers can quickly and easily obtain an overview of the status of ALL major network device links from one screen.

### Information Examples:

- Connected Port Numbers Between Two Devices
- Link Speed
- Receive and Transmit Throughput
- Connection Status
